Attendees:

- Alex
 - Hanro
 - Gabriella
 - Arno
 - Emile
 - Stian
 - Brandon
 - Marius
-

Agenda:

Topic 1: Confirm Plant Requirements

- Confirm everyone has completed their plant requirements

Address any questions or concerns

Topic 2: Worked through work maintenance slides

Read through the summary of the slides for the previous class

Topic 3: Risk checkup and meeting planning

- Complete the group risk matrix for this week
 - Plan the next meeting
-

Decisions:

Topic 1: Confirm Plant Requirements

- Plant requirements are complete for all members, except Brandon and Hanro (section revisions).
- Quality checker has received all requirement submissions.

Topic 2: Worked through work maintenance slides

- Possible online meeting with Prof Holm regarding maintenance plant requirements.
- Group has decided not to discuss slides in this meeting, and will rather wait for in-depth discussion with Prof.

Topic 3: Risk checkup and meeting planning

- Plant concept is due **May 4th**.
- Stian will be the primary on this, with Alex, Emile, and Hanro providing support.
- Many risks stay the same, as the upcoming week was considered when evaluating risks in the last meeting.
- The team received good feedback on our risk matrix. Individual risks should be continuously updated – irrelevant risks should be removed, while any new risks should be added to the risk matrix. New risk document is 1.3.
- Sunday 6pm will

Next Steps:

- Update individual risk matrixes and work management document by Sunday 6pm.
 - The next meeting will be held upon completion of the plant concept plan.
-

Risk Tracking

- The group risk matrix was reviewed by the group, but no risks were found needing an update to their impact/likelihood .
